| In order to allow mapping from ORCID (and other) subject identifier schemes, the D1 identity service needs to allow non-DN based subject identifiers. |                     |                        |               |
| <b>Subtasks:</b>  |                     |                        |               |
| Task # 7500: Ensure LDAP schema supports non-DN Subjects  |                     |                        | <b>Closed</b> |
| Task # 7501: Update CN identity manager implementation to support non-DN Subjects   |                     |                        | <b>Closed</b> |
| Task # 7502: Ensure all D1 libraries and utilities allow non-DN Subjects  |                     |                        | <b>Closed</b> |
| Task # 7510: Edit ID reservation service to support non-DN subjects   |                     |                        | <b>Closed</b> |
| Task # 7511: Ensure node registry allows non-DN subjects  |                     |                        | <b>Closed</b> |

#### History

##### #1 - 2015-12-02 23:19 - Ben Leinfelder

- Target version changed from CCI-2.1.0 to CCI-2.0.2

targeting immediately after 2.0.0

##### #2 - 2015-12-05 03:43 - Ben Leinfelder

- Status changed from New to In Progress

- % Done changed from 0 to 30

This needs to be deployed - from trunk and beta builds - and tested with the UI. The unit tests are passing, but we should make sure other components and integration tests work as expected.

##### #3 - 2015-12-11 22:32 - Ben Leinfelder

- Status changed from In Progress to Closed

- % Done changed from 30 to 100

Have deployed and done initial testing of this on cn-sandbox-2. Integration tests are being written and we will have a dedicate UI with orcid and cilogon profiles enabled to play around with more. Right now you can login with your orcid and be automatically registered in dataone, just like with cilogon.
