Infrastructure - Task #7507

Include ORCID API configuration in postinst

2015-12-04 01:48 - Ben Leinfelder

Target version:	CCI-2.0.2		
Milestone:	None	**Story Points:**	
Product Version:	*		

Description

To use the ORCID public API, we need to configure a client id and secret key. Currently the portal uses the orcid sandbox with credentials that are not so sensitive (and committed to svn).
The two values would need to be input each time the portal is deployed (annoying) but I don't see any way around this.
It looks like the cn-os-core buildout is the only one that prompts for user input (keystore password and ldap password) so I'm not sure how readily we can make the portal build-out do the same during debian package config/installation.

- Status changed from New to In Progress

- % Done changed from 0 to 30

Robert did a nice write-up of what is needed to add a configuration question. That's now in trunk and will soon be merged to the 2.0 branch for 2.0.1 packaging.

#3 - 2015-12-05 03:18 - Ben Leinfelder

- Status changed from In Progress to Testing

- % Done changed from 30 to 50

now in the 2.0 branch of the buildout as well.
