

CN REST - Task #7545

Secure test service passwords in LDAP configuration

2015-12-11 17:03 - Chris Jones

Status:	Closed	Start date:	2015-12-15
Priority:	Normal	Due date:	
Assignee:	Ben Leinfelder	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	CCI-2.0.2		
Story Points:			
Description			
<p>Matt requested that we no longer use cleartext easy passwords for the test CN deployments. Change the password for test installations of OpenLDAP. Add these passwords to SystemPW.txt.gpg. Make sure everyone involved in CN deployments know where to find the new passwords.</p> <p>Also, change the rootpw entry in slapd.conf to use an encrypted password rather than plaintext. In the postinst for the dataone-cn-os-core buildout, secure the slapd.conf file with:</p> <pre>chmod 0600 \$LDAP_CONF_DIR/slapd.conf*</pre>			
Subtasks:			
Task # 7556: Use hashed rootpw in slapd.conf			Closed
Task # 7557: Restrict read access to slapd.conf			Closed
