Description

When I am logged in via ORCID and create a new group, the group is successfully created but the rightsHolder value inserted in the group are incorrect - my ORCID subject is listed as "UID=<http://orcid.org/0000-0003-2192-431X>,DC=dataone,DC=org" instead of just "<http://orcid.org/0000-0003-2192-431X>" - The hasMember value however, is correct.

Example:

<https://cn-sandbox.test.dataone.org/cn/v2/accounts/CN=My%20ORCID%20group,DC=dataone,DC=org>

CN=My ORCID group,DC=dataone,DC=org

My ORCID group

<http://orcid.org/0000-0003-2192-431X>

UID=<http://orcid.org/0000-0003-2192-431X>,DC=dataone,DC=org

When I sent the request to create the group, I did not supply any hasMember or rightsHolder nodes in the XML - just the subject and groupName.
