Target version:	CCI-2.0.2	Story Points:	
Milestone:	CCI-2.0		
Product Version:	*		

**Description**

With our move to the DataONE Search UI, the dataone-mercury-ui postinst is no longer redirecting <https://cn.dataone.org> to <https://cn.dataone.org/one mercury>. We now want to have <https://cn.dataone.org> redirect to <https://search.dataone.org>.

Likewise, for test environments, we have the following Search UI virtual hosts:

- <https://search-dev.test.dataone.org>
- <https://search-dev-2.test.dataone.org>
- <https://search-sandbox.test.dataone.org>
- <https://search-sandbox-2.test.dataone.org>
- <https://search-stage.test.dataone.org>
- <https://search-stage-2.test.dataone.org>

When deploying dataone-cn-os-core in these environments, the postinst should redirect to the appropriate virtual host.

In production, use:

RedirectMatch /\$ <https://search.dataone.org>

In test envs, use:

RedirectMatch /\$ <https://search-{env}.test.dataone.org>

**History**

- #1 - 2015-12-18 22:41 - Ben Leinfelder
- Status changed from New to Closed
  - % Done changed from 0 to 100
  - translation missing: en.field\_remaining\_hours set to 0.0

added this to trunk and branch. uses the debian templates to have different values for each environment.
