

## Infrastructure - Task #7606

Story # 7605 (New): MemberNodes not authorizing CN to harvest log records

### NRDC does not trust the CN certificate for log harvesting

2016-01-26 16:00 - Robert Waltz

<b>Status:</b>	In Progress	<b>Start date:</b>	2016-01-26
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Laura Moyers	<b>% Done:</b>	30%
<b>Category:</b>	Environment.Production	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Maintenance Backlog	<b>Story Points:</b>	
<b>Milestone:</b>	None		
<b>Product Version:</b>	*		
<b>Description</b>			
urn:node:NRDC throws a NotAuthorized exception when the CN attempts to harvest log records:			
org.dataone.service.exceptions.NotAuthorized: Access allowed only for DataONE infrastructure. Active subjects: authenticatedUser (equivalent), public (equivalent), CN=urn:node:CNUCSB1,DC=dataone,DC=org (primary). Trusted subjects: CN=urn:node:NRDC,DC=dataone,DC=org			
From the message it appears that NRDC may only trust itself to harvest log records.			

#### History

##### #1 - 2016-01-27 16:12 - Laura Moyers

- Status changed from New to In Progress
- % Done changed from 0 to 30

NRDC operates as a reverse proxy; perhaps their setup has something to do with this behavior. Investigating.

##### #2 - 2016-02-04 16:23 - Laura Moyers

Laura, Robert, and Mark met with Eric Fritzing from NRDC on 2/3/16. Eric is planning to rework the NRDC setup from reverse proxy to "normal" public-facing operations. He'll have to coordinate with the UNR IT folks as they try to keep all the UNR stuff tightly controlled.
