<b>Target version:</b>	Maintenance Backlog	<b>Story Points:</b>	
<b>Milestone:</b>	None		
<b>Product Version:</b>	*		

#### Description

urn:node:LTER\_EUROPE fails with a NotAuthorized exception:

org.dataone.service.exceptions.NotAuthorized: Only the CN or admin is allowed to harvest logs from this node

LTER\_EUROPE does not appear to recognize the CN certificate as a valid CN certificate. Jing may be able to help diagnose why since LTER\_EUROPE is a metacat installation

Bases from our experience with IOE, we should check that Apache is configured correctly to trust the DataONE Production CA cert,

SSLCACertificateFile /etc/ssl/certs/DataONECACChain.crt

and that Apache is verifying client certs,

SSLVerifyClient optional
