

## CN REST - Bug #7687

### Synchronization unable to change BaseURLs upon updateNodeCapabilities notification

2016-03-23 18:34 - Robert Waltz

<b>Status:</b>	New	<b>Start date:</b>	2016-03-23
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Rob Nahf	<b>% Done:</b>	0%
<b>Category:</b>	d1_synchronization	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Story Points:</b>			
<b>Description</b>			
Synchronization does not change the baseurl of a membern timer after the membern timer has called updateNodeCapabilities in order to update its baseurl.			
Synchronization keeps a pool of d1clients associated with a membern timer id.			
NodeCommObjectListHarvestFactory and NodeCommSyncObjectFactory will each need to be notified if a membern timer has changed its baseurl node. Those objects can then purge and re-initialize the d1clients responsible for maintaining communication to the membern timer.
