Description

Dave reported:

when running "service solr status" on a CN, I see a complaint about multiple SLF4J bindings:

(12:05:53 PM) vieglais: SLF4J: Class path contains multiple SLF4J bindings.

(12:05:53 PM) vieglais: SLF4J: Found binding in

jar:file:/var/solr/server/solr-webapp/webapp/WEB-INF/lib/d1_solr_extensions.jar!/org/slf4j/impl/StaticLoggerBinder.class vieglais:

SLF4J: Found binding in <jar:file:/var/solr/server/lib/ext/slf4j-log4j12-1.7.7.jar!/org/slf4j/impl/StaticLoggerBinder.class> vieglais: SLF4J:

See http://www.slf4j.org/codes.html#multiple_bindings for an explanation.

(12:05:56 PM) vieglais: SLF4J: Actual binding is of type [org.slf4j.impl.Log4jLoggerFactory]

looks like a class conflict due to the shaded d1_solr_extensions.jar that includes SLF4J and solr jetty that also includes SLF4J.

try excluding SLF4J jars in d1_solr_extensions.jar.
