<b>Category:</b>	Requirement	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b> There should be well-known mechanisms in the authorization system to allow access rules that explicitly grant access to pseudo-principals, including: <ul style="list-style-type: none"><li>• public: anonymous, non-authenticated users</li><li>• valid-user: authenticated user</li><li>• registered-user: authenticated user with explicit minimal contact information</li><li>• verified-user: authenticated user with explicit minimal contact information that has been verified as belonging to a real account holder</li></ul>
