Infrastructure - Story #7713

d1DebConfig.xml should be versioned in dataone-cn-os-core

2016-04-11 15:04 - Robert Waltz

Target version:			
Story Points:			

Description

A version attribute should be added to the type debConfType in dataoneDebuPkgConfigTypes.xsd.

This will allow the debConfig root element to be versioned such that when dataone-cn-os-core is updated/installed, there is a better way to differentiate between the file located on releases website:

https://releases.dataone.org/debian/conf/d1DebConfig.xml

and the one stored on the filesystem:

/etc/dataone/d1DebConfig.xml

The intention of having an up-to-date version on releases.dataone.org is to be able to reconfigure the dataone without having to re-install dataone-cn-os-core

The xml schema file will also need to be updated and versioned
