

Python GMN - Bug #7739

GMN Django models need to be adjusted for var char content greater than 1024 character length

2016-04-14 14:46 - Mark Servilla

Status:	New	Start date:	2016-04-14

Target version:			
Story Points:			

Description

Inserting content in GMN database tables fail when string content exceeds 1024 length.

A specific example occurs with the mn_systemmetadatafreshqueuestatus.status field, which is set to status = models.CharField(max_length=1024, unique=True). An exception occurs when setting the status field to a string with length greater than 1024:
