Description

"GINA is a mechanism within the University of Alaska (UA) for sharing data and technical capacity among Alaskan, Arctic, and world communities.

Established in 2001 as an initiative of UA's President, GINA promotes collaboration at the local, state, and federal levels by increasing community-wide participation in the discovery and use of geospatial data. GINA's products and services greatly expand the range of available analysis capabilities in order to better address research and management requirements."

The latest from Vanessa 8/15/17:

We picked up our DataOne work again in July and are still working on it. We have created a set of DataOne data requirements and adding PIDs to different aspects of our data. So far so good. We'll check in with you when we reach a milestone.

UPDATE 12/18/2017 (RK) - GINA is still interested in becoming a MN but resources are the main stumbling block; we should keep them on the list
