

## Python GMN - Task #7765

### Add "logrotate" capability as part of the GMN deployment

2016-05-04 02:38 - Mark Servilla

<b>Status:</b>	New	<b>Start date:</b>	2016-05-04
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Story Points:</b>			
<b>Description</b>			
<p>GMN log content (gmn.log, gmn_replication.log, and gmn_sysmeta.log) can be quite verbose and voluminous, causing filesystem congestion and viewing frustration. Most Linux derivatives support a system mechanism for automated log rotation, such as the "logrotate" application. Add "logrotate" capability as part of the GMN deployment, including appropriate documentation. See below for a sample "logrotate" script:</p>			
<pre>"/var/local/dataone/gmn/lib/python2.7/site-packages/service/*.log" { size=100M compress missingok notifempty }</pre>
