Description

The [DataoneServiceAPI](#) interfaces [CoordinatingNodeCrud](#) / Query are not implemented in the wired controller to the application (cn.rest.proxy.controller.ObjectController). It is implemented by the [ObjectController](#) in cn.rest.controller, but this is template code. So a decision will need to be made to as to whether to implement these interfaces or something else, and clean up the unused code (or comment it so that we know it is deprecated).
