Story Points:				

Description

The second of the three issues noted below is probably the same as this: https://redmine.dataone.org/issues/7829 (wonky map rendering).

From an email from Laura Moyers to Adam Brin 7/8/16:

Hey, Adam,

For the first one, are these the other geographic keywords you mean?
NSWEastern RiverinaLittle BillabongHillside
On the metadata view of the search results, it shows "Geographic Description" NSW (the first entry). I guess we would expect to see "Geographic Description" listed 4 times for each of the 4 values, right?

For the second one, the wonky map is a known thing that Lauren is addressing (thank you, Lauren!), but I do see how the three temporal coverage fields are being concatenated in the metadata view.
19th century20th CenturyArchaeology of Rubbish
"Single Date" 19th century20th CenturyArchaeology of Rubbish

For the third one, I don't see the contributors in the metadata view, and I would expect to see these guys:
Korsgaard, Annika (NSW Archaeology Online Project, University of Sydney)Blake, Natalie (University of Sydney)

Lauren, do you think these are not appearing as expected in the search results metadata view because of something to do with the DCX stylesheet? Can you please investigate? I don't know enough to sort it.

Thanks!
Laura

Hi Laura & Mark,
Looks like the sync is done. Some issues found on a pass through, I'm pairing the tDAR and the DataOne URLs together:

https://search-sandbox.test.dataone.org/#view/doi:10.6067:XCV843402_meta
http://alpha.tdar.org/document/43402/people-in-the-landscape-a-biography-of-two-villages

- geographic keywords are not displaying multiple, just one

https://search-sandbox.test.dataone.org/#view/doi:10.6067:XCV843399_meta
http://alpha.tdar.org/document/43399/the-archaeology-of-rubbish-or-rubbishing-archaeology-backward-looks-and-forward-glances

- temporal keywords are being combined
- also missing lat/long but showing bounding box? Perhaps Nan location is a bad interpretation of a lack of lat/long?

https://search-sandbox.test.dataone.org/#view/doi:10.6067:XCV843392_meta
http://alpha.tdar.org/dataset/43392/judy-m-birmingham-image-collection-drawer-g

- missing DC contributors

Otherwise, looks good here.

History

#1 - 2016-07-11 20:47 - Lauren Walker

- Status changed from New to Closed

- % Done changed from 0 to 100

- translation missing: en.field_remaining_hours set to 0.0

I've fixed all three of these issues, plus the known geographic coverage issue. These changes will be in 2.7.1 of Metacat. I deployed these changes to the DCX stylesheet on search-sandbox.test.dataone.org now so that you can continue to work in sandbox without these bugs.
