

Search UI - Bug #7885

Member node profile statistics from search.dataone.org returns 0 values

2016-09-12 11:55 - Mark Servilla

Description

When viewing MN statistics from search.dataone.org after selecting the MN profile link via the MN icon, 0 statistics are returned. However, when viewing the same statistics from the MN section of the DataONE home page, full statistics are returned.

The link with 0 stats which is accessed directly from the search.dataone.org MN icon:

- <https://search.dataone.org/#profile/urn:node:LTER>

The link with full stats which is accessed from the MN section of the DataONE home page:

- <https://search.dataone.org/#profile/LTER>

The difference is in the *MN identifier* that is used in the resource URL. This affects all MNs.

History

- Status changed from New to Closed

- % Done changed from 0 to 100

Thanks for catching this, Mark. I've fixed it on production.
