Description

To help verify that the public web site will operate correctly on the dataone.org domain and ensure there are no hard coded links to beta.nmepscor.net, we need to setup a new DNS record for the service and switch the service to operate under the new entry.

This task is to create a new A record in the **DataONE** DNS database:

A public-web.dataone.org 129.24.0.29

Task needs to be completed by 2010-08-24
