#### Description

When the public web site comes online, it will be accessible at the URLs:

<http://dataone.org>

<https://dataone.org>

<http://www.dataone.org>

<https://www.dataone.org>

We need to verify that the site will operate correctly when the name is changed, i.e. there should be no hard-coded locations that refer to <http://beta.nmepscor.net/> that need to be switched over.

This can be tested by placing the site under a dataone.org name and verifying that all links are still correct. Suggest a new DNS entry "public-web.dataone.org". dataone.org and [www.dataone.org](http://www.dataone.org) can be aliases for that location when necessary. See [#790](#) and [#791](#)

#### History

##### #1 - 2010-08-24 21:09 - Matthew Jones

The DNS entry for public-web.dataone.org has been created.

##### #2 - 2010-10-02 02:29 - Dave Vieglais

- Status changed from New to Closed

##### #3 - 2010-10-07 00:14 - Dave Vieglais

- Target version deleted (Operations.Public-web.Release)
