

Python GMN - Story #8074

Story # 8032 (In Progress): GMN v2

Eliminate unnecessary setuid/setgid programs

2017-04-17 18:14 - Roger Dahl

Status:	New	Start date:	2017-04-17
Priority:	Normal	Due date:	
Assignee:	Roger Dahl	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Story Points:			
Description System installers often install numerous setuid/setgid programs that are unnecessary, and in some case introduce vulnerabilities, which enable privilege escalation. setuid/setgid programs which are not needed for proper functioning of the system should be removed or disabled. Those that are needed should be evaluated for vulnerability and configuration issues.
