

Python GMN - Story #8075

Story # 8032 (In Progress): GMN v2

Story # 8074 (New): Eliminate unnecessary setuid/setgid programs

Consistent and accurate date and times across infrastructure

Description

Inaccurate system timestamps can make it very difficult to analyze log files from hosts/systems. Consistent and accurate date and times across infrastructure.

Use NTP (Network Time Protocol) to synchronize the clocks of all hosts/systems.

History

#1 - 2017-12-26 18:13 - Dave Vieglais

- % Done changed from 0 to 100

- Status changed from New to Closed

All systems should already be configured with NTP and should also use UTC for timezone.
