

Infrastructure - Story #8173

add checks for retrograde systemMetadata changes

2017-09-01 19:42 - Rob Nahf

Status:	New	Start date:	2017-09-01
Priority:	High	Due date:	
Assignee:	Jing Tao	% Done:	0%
Category:	d1_indexer	Estimated time:	0.00 hour
Target version:	CCI-2.4.0		
Story Points:			
Description with the ability to prioritize and the introduction of parallelized index task processing, the effective queue is not guaranteed to be time-ordered. If there are two valid system metadata changes resulting in two tasks and the second change hits the index first, the earlier task should be rejected, as its changes are out of date.
