Figshare action items:

* share the test environment endpoints so we can access the OAI-PMH service for the test setup

* email back the completed MN description docs to see what other questions we'll have.

3/5/18 {Dan Valen} Will pass along the stage endpoints as soon as the Cary Institute instance is up in stage. I'll loop everyone once he follows-up and we can begin testing OAI-PMH functionality.

3/9/18: from Tudor Panescu tudor@figshare.com

You can test our OAI-PMH interface using https://api.figsh.com/v2/oai?verb=ListRecords&metadataPrefix=oai_dc&set=portal_2750 (the important part is the set=portal_2750 query parameter).

This is the ListSet for the Cary Institute testing instance, available at <https://caryinstitute.figsh.com/> (the basic authentication credentials are gguest / 159357456). If you need some new items created, I can either create them for you, or quickly show you around our interface, whichever suits you best.
