

Member Nodes - Bug #8295

MNDeployment # 7082 (Operational): USGS Science Data Catalog (SDC)

USGS base URL changed to https

2018-02-05 18:39 - Dave Vieglais

Status:	Closed	Start date:	2018-02-05
Priority:	Normal	Due date:	
Assignee:	Mark Servilla	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Story Points:			
Description			
The base URL for the USGS MN has changed from http to https, with a redirect from http to https.			
The USGS node document needs to be updated to reflect this change to ensure ongoing normal operations. This change should be made on the MN, and an updateNodeCapabilities call made to the CN to update information there.

Good morning, Mark.

We've been dealing with similar issues with other applications here, so it doesn't surprise me that this has become an issue for our node as well.
Thank you for the heads up. I'll try to get these items updated as soon as I have a free moment.

Thank you,

Aaron Stokes

Subject: urn:node:USGS_SDC web protocol change from HTTP to HTTPS...

Hi Aaron,

I am not sure if you are still involved with the USGS_SDC DataONE member node, but we have noticed that the base URL is now issuing a 302 redirect from HTTP to HTTPS. Unfortunately, the DataONE coordinating node does not follow redirects, and this results in an error when attempting to communicate with the USGS_SDC member node. The easiest solution would be for you to update your node registration information at (PUT) https://cn.dataone.org/cn/v2/node/urn:node:USGS_SDC with an updated version of the node_registration.xml document that reflects the new protocol. Perhaps now would also be a good time to add a new DataONE user at <https://search.dataone.org> and update the "Contact Subject" field, also in the node registration document, if Jim Green is no longer the primary point of contact.

Please let me know if there is another contact at ORNL whom I should be contacting with regard to this issue or if you have any further questions. Thank you.

Sincerely,

Mark
