Target version:			
Story Points:			
Description <ul style="list-style-type: none">• Confirm chosen deployment path.• Communicate knowledge of technical requirements for selected deployment. These can include:<ul style="list-style-type: none">◦ SSL certificate.◦ FQDN.◦ Apache web server with Python 2.7 or Java (depending on stack).• Confirm metadata format. Communicate expectations for metadata quality.• Specify in advance whether a separate test installation will be maintained in parallel with production. This is important for planning the deployment. A separate test will need distinct subdomain and SSL cert if not using wildcard.
