Description

Initial determination of operational and technical feasibility. Addresses:

Operational Feasibility:

- Repository meets sustainability expectations.

Technical Feasibility:

- What data will be exposed?
- Content mutability.
- Software needs:
    - DataONE software stack or implement new web service in existing applications (custom stack)?
    - Full repository or Slender Node?
    - metadata only or science data + replication?
    - Repository's in-house preferences? (Java? Python?)
- Consistency of metadata quality.
- Level of functionality (tier).
