Target version:	CCI-0.5		
Milestone:	None	**Story Points:**	
Product Version:	*		

Description

If count is not provided in the query to MN_replication.listObjects() or CN_query.search(), the default returned is a maximum of 1000.

If the count is not provided in the query, and the total < 1000, then the count should equal total. If the total > 1000, then the count returned should be 1000.

Currently, if count is not provided, then the count returned is 1000 regardless of whether the total is over 1000.
