<b>Target version:</b>			
<b>Story Points:</b>			

**Description**

Discovery: establish contact and build relationship with a potential new member node. Determine if DataONE and the repository are a good fit for one another and if the repository generally meets the requirements of DataONE member nodes.

Planning: If the repository and DataONE have agreed to proceed with deployment as a member node. Decisions will be made as to how to proceed with development. Node operators will receive training.

This story is complete when a determination is made to either proceed with planning a new deployment, or that joining DataONE is not an option for the repository at this time.
