Description The Forest Service Research Data Archive is an actively curated repository for the long-term preservation and distribution of citable research data sets that are broadly relevant to forest and grassland ecology, and the economic and social interactions of humans with these ecosystems. Most data sets were created by U.S. Forest Service scientists or by scientists funded through the U.S. Forest Service or the U.S. Joint Fire Science Program.			

History

#1 - 2018-04-17 20:00 - Amy Forrester

- per LT meeting 4/13/18
- USDA, small in size, good metadata
