Description

When I indexed a data object, it rejected to index and threw an exception:

====Unable to find the object path for id:

<https://pasta.lternet.edu/package/data/eml/knb-lter-arc/20048/1/dddf0ae9a1920ddb9f2c63ccaae1774>. So it will be ignored for reindexing.

The data objects don't store on CN, so they always don't have a object path.
