Description
Possibly related to [#8244](#8244)
The IOE repository is not responding at the expected baseURL of:
https://data.rcg.montana.edu/catalog/d1/mn
and instead returns an error that SSL connection is not available. Attempting to use http instead of https returns a 404 error.
Contact the server administrator and have them check the service availability.

6/18/18: contact from Todd

> I am looking into this issue. We have had SSL issues in the past, and this is an area where I will need to get some additional help. We have a new technical position starting July 1, and I may not be able to get to this until that person starts on the job. But I will try what I can in the meantime.
