

Member Nodes - Bug #8623

MNDeployment # 3238 (Operational): Idaho Northwest Knowledge Network member node

NKN Node certificate has changed, CN doesn't match server

2018-06-18 19:10 - Dave Vieglaiss

Status:	Closed	Start date:	2018-06-18
Priority:	Normal	Due date:	
Assignee:	Mark Servilla	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Story Points:			
Description			
The NKN node appears to using a different server certificate with:			
CN=*.northwestknowledge.net			
Though the baseURL for the MN is:			
https://dataone.nkn.uidaho.edu/mn			
This results in a connection failure since the host name does not match the certificate.			
Need to contact the node administrator and determine what has changed and how it should be corrected.			

History

#1 - 2018-06-18 20:17 - Mark Servilla

An email notifying the NKN MN operator(s) of the current issue has been sent to both Carrie Roever and Luke Sheneman.

#2 - 2018-06-18 21:23 - Mark Servilla

Received response from Carrie Roever:

Our MN has been experiencing a few issues since the update occurred a few weeks back. I believe that Luke sent an email to Roger Dahl explaining. Unfortunately I do not have the expertise to elaborate on the issues, and Luke is out of the country for a few weeks.

If you believe that updating the domain will help and not further exacerbate any issues, then I believe it would be okay to correct. However, if you are uncertain, it might be best to wait until Luke returns.

Seems best to wait for Luke Sheneman's return.

#3 - 2018-06-18 21:27 - Mark Servilla

Note that follow-up with Roger Dahl indicates that there has been no recent communication with NKN personnel on this particular issue:

Latest we have is from Luke in early May, "We appreciate it. I am going to work with Carrie Roever and get her up to speed on better managing

our DataONE MN."
