Target version:			
Story Points:			
Description			
The MN server certificate for the NRDC node has expired and needs to be updated.			
This is a let's encrypt issued certificate so it may be that the cert has been renewed but the server has not been restarted to pick up the new certificate.			
<pre>echo "Q" openssl s_client -connect dataone.sensor.nevada.edu:443 openssl x509 -text -noout</pre>

History

#1 - 2018-06-18 20:00 - Mark Servilla

An email has been sent to Hannah Munoz and Eric Fritzinger reporting this issue.

#2 - 2018-07-27 20:48 - Amy Forrester

7/23/18: Connor Scully-Allison

I am taking over for Eric Fritzinger as the Sys Admin of the larger NRDC system, including our DataONE Member Node. Hannah Munoz, who has been your primary point of contact up until this point will be graduating and leaving us soon as well so I will become your primary point of contact in coordinating our efforts to get this node back online.

7/25/18: Mark

When I attempt to query the GMN member node (this date), i receive a 404 response from Apache. Need a call

#3 - 2018-07-30 14:18 - Amy Forrester

7/30/18 reach out to Connor- propose Aug 8 meeting

#4 - 2018-08-10 16:49 - Mark Servilla

- % Done changed from 0 to 100

- Status changed from New to Closed

The NRDC MN has been off line since mid-May 2018, at first due to an expired LetsEncrypt SSL certificate and then second for a configuration issue that led GMN to be inaccessible.

The first issue was resolved by manually reissuing the LetsEncrypt certificate. This action, however, inadvertently resulted in a second Apache SSL configuration to be generated, which over-road the gmn-ssl.conf configuration. Roger Dahl intervened on behalf of NRDC to correct this issue on Thursday 9 August 2018.

All NRDC systems appear to be up and operating as expected.
