8/28- reply from connor

I need to upgrade the virtual machine that hosts our GMN to Ubuntu 16 or greater to enable the GMN upgrade. I'm currently investigating the impact this will have on my system, so I will get back to you guys about this matter shortly.

11/14/18 (from Connor): My planned upgrade unfortunately did not go through as planned due to a few other issues which bugged the NRDC out and has required a multi week hard-drive migration. It's on my very long todo list as soon as the NRDC is on the new HDDs.
