Target version:	CCI-0.5	Story Points:	
Milestone:	None		
Product Version:	*		
Description			
The health API was rewritten, with diminished summarizing capability, so existing cacti plugin components (script, input method, data template, graph template) probably need to be redone.			

History

#1 - 2010-09-20 22:28 - Rob Nahf

figured out new calls for populating the data source. Might be able to salvage the existing templates and input model.
Need to check whether the latest da-by-day count is for today, and then deploy.

#2 - 2010-09-21 20:58 - Rob Nahf

installed and tested. Had to rebuild data template. Structure of Cacti has data collected into 2 data sources, redundantly. This can be optimized with a more generalized health script (parameterized). consider it a TODO for future.
