<b>Story Points:</b>			
<b>Description</b>			
9/4: For the time being we turned off Metacat as we have deployed a new service that incorporates more and nodes and systems that DEIMS had.			
11/20: Want to provide data to DataONE through their data integration portal (DIP – <a href="http://dip.biosense.rs/">http://dip.biosense.rs/</a> ).			
* The system is designed to act as a central access point for data and already allows access to multiple LTER Europe nodes, including DEIMS.			
* It utilises CSW to expose ISO 19139 metadata. The endpoint = <a href="http://dip.lter-europe.net/geonetwork/srv/eng/csw?SERVICE=CSW&amp;VERSION=2.0.2&amp;REQUEST=GetCapabilities">http://dip.lter-europe.net/geonetwork/srv/eng/csw?SERVICE=CSW&amp;VERSION=2.0.2&amp;REQUEST=GetCapabilities</a>

###### Full implementation will not begin until Spring 2019.

DataONE preliminary work (check endpoints, PIDs, config adapter, etc)  
eLTER action items to address:

- Provide your OAIMPH endpoint status?
- Confirm CSW endpoint: <http://dip.lter-europe.net/geonetwork/srv/eng/csw?SERVICE=CSW&VERSION=2.0.2&REQUEST=GetCapabilities>
- Confirm centos version S7
- Can you provide us with the additional sources of data being contributed to DIP beyond DEIMS that will be exposed via DataONE?
