<b>Story Points:</b>			
<b>Description</b> <p>Operators on ESS-DIVE are trying to generate a report by querying the solr server. The report will include the replica information. However, the field "replicationStatus" currently is not indexed in our process and this makes their report incomplete.</p> <p>So they request to add "replicationStatus" in the schema.xml and the rule to index the field.</p> <p>Moreover, "replicationStatus", "replicatMN" and "replicaVerifiedDate" should be searchable. So those fields should set the attribute "indexed" true. Currently they are false on the fields "replicatMN" and "replicaVerifiedDate".</p>
