

Infrastructure - Decision #8774

Add new CN format for MPEG-2 or update video/mpeg format to cover MPEG-2

2019-03-08 02:04 - Bryce Mecum

Status:	New	Start date:	2019-03-08
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Milestone:	None		
Description			
We already have this format:			
<pre><objectFormat> <formatId>video/mpeg</formatId> <formatName>MPEG-1 Video</formatName> <formatType>DATA</formatType> <mediaType name="video/mpeg"/> <extension>mpg</extension> </objectFormat></pre>			
It clearly says MPEG-1 Video but there is also an MPEG-2 format. It'd be useful to have a proper format ID to use for MPEG-2 video. The info for MPEG-2 is largely the same as for MPEG-1 (format type, mediaType, extension). Should we add a new format or just update the description of the existing one? We also have an MP4 format type so maybe that'd be a reason to just add another to cover MPEG-2.

I'd suggest we add new format types for the various MPEG standards (1, 2, 4). We'll need to evaluate the IANA registry and see how they are differentiated with media types.
