| Description Provision a backup mechanism for LDAP on the CNs. | |
| Subtasks: Task # 8804: Add ldap backup config to cn os-core New | |

History

#1 - 2019-05-21 11:26 - Dave Vieglais

- % Done changed from 0 to 30
- Status changed from New to In Progress

The [ldap-git-backup](#) utility looks ideal for this purpose.

#2 - 2019-05-21 11:33 - Dave Vieglais

Installed ldap-git-backup on the production CNs. Procedure:

```
sudo apt-get install ldap-git-backup
```

```
/etc/cron.daily/ldap-git-backup:
```

```
#!/bin/sh  
/usr/sbin/ldap-git-backup
```

and make executable:

```
sudo chmod a+x /etc/cron.daily/ldap-git-backup
```

Output to /var/backups/ldap which is a bunch of LDIF files managed by git and easily searched with grep.
