Description

The BagIt entry in the objectFormatList returned by the CN currently does not include an extension element:

```
<objectFormat>
    <formatId>application/bagit-097</formatId>
    <formatName>BagIt File Packaging Format Version 0.97</formatName>
    <formatType>DATA</formatType>
</objectFormat>
```

I think it should be zip, so:

```
<extension>zip</extension>
```

History

#1 - 2019-06-07 14:39 - Roger Dahl

- % Done changed from 0 to 100

- Status changed from New to Closed

Bagit doesn't define the compression format, so we need to keep the extension unspecified.
