Description			
<p>While testing schema_org adapters for ARM and IEDA, I noticed that 9 documents found in the IEDA site map have malformed JSON-LD script elements. These nine documents do not appear in DataOne when using search. There are two issues arising in the malformed JSON-LD:</p> <ol style="list-style-type: none">1. description values have over-escaped double-quotes, i.e. \"bipolar seesaw\" rather than \"bipolar seesaw\". See IEDA documents with IDs 601015, 601098, e.g. http://get.iedadata.org/metadata/iso/6010152. description values have embedded double-quotes that are not properly escaped at all. See IEDA documents with IDs 600165, 601033, 601076, 601077, 601089, 601103, 601178 <p>Fixing the over-escaped double-quotes is easy to do on the fly, but the under-escaped double-quotes requires taking a bit more care (still doable on the fly).</p>
