Description

I was looking at <http://jenkins-1.dataone.org/jenkins/view/Documentation%20Projects/job/ProvONE-Documentation-trunk/ws/provenance/ProvONE/v1/provone.html> today and Chrome and Safari are both upset with how its CSS and JS are set up and are refusing to load either.

Steps to reproduce:

1. Go to <http://jenkins-1.dataone.org/jenkins/view/Documentation%20Projects/job/ProvONE-Documentation-trunk/ws/provenance/ProvONE/v1/provone.html>
2. See no styles are loaded, hide/show examples buttons don't work. See errors in devtools about CSP errors.

Needed to set csp on the Jenkins server:

<https://wiki.jenkins.io/display/JENKINS/Configuring+Content+Security+Policy>

in /etc/defaults/jenkins

Thanks! It's much better now. Do you care about the remaining CSP errors the page throws?

Not seeing any errors on page load except 404 for favico.

OK, should be sorted now.
