Task # 891: schema change procedure	Closed

History

#1 - 2010-10-07 19:53 - Matthew Jones

Release cycle needs to handle transitions through at least three stages:

- a) Development: current active changes to introduce new functionality
- b) Staging: test environment
- c) Production: versions deployed for external consumption

At each stage, we need to consider how to version and introduce changes in:

- a) schemas that define information models
- b) APIs that define service and communication interfaces
- c) components and libraries that implement a) and b) and that might have dependencies on each other.

#2 - 2010-11-08 18:09 - Dave Vieglais

- Position set to 5
- Target version set to Sprint-2010.46
- Position deleted (31)

#3 - 2010-11-22 17:34 - Dave Vieglais

- Position deleted (37)
- Position set to 29
- Target version changed from Sprint-2010.46 to Sprint-2010.47

#4 - 2010-11-30 18:18 - Dave Vieglais

- Target version changed from Sprint-2010.47 to Sprint-2010.48
- Position deleted (38)
- Position set to 2

#5 - 2010-12-13 18:34 - Dave Vieglais

- Target version changed from Sprint-2010.48 to Sprint-2010.50
- Position set to 8
- Position deleted (31)

#6 - 2011-01-03 03:02 - Dave Vieglais
